

Captions on Annotations

It is possible to show a value of a qualifier of an annotation instead of the annotation type name in the *Sequence Zoom View*. To enable this option for an annotation type check the *Show value of qualifier* check box and input the values of the required qualifiers in the text field nearby this check box. See the image below.

The screenshot displays a bioinformatics software interface with a sequence viewer and a configuration panel. The sequence viewer shows a DNA sequence with a highlighted region from 5245 to 5833 bp. The configuration panel, titled "Annotations Highlighting", allows users to select an annotation name and configure its display options. The "Show value of qualifier" option is checked, and the text field below it contains "note".

Annotation	Color
BadI	Light Green
BaeGI	Orange
BaeI	Purple
CDS	Green
SacI	Cyan
comment	Pink
misc_feature	Yellow
source	Grey

Name	Type	Value
NC_001363 features [m...]		
source (0, 1)		
misc_feature (0, 2)		
misc_feature	Misc. Feature	5245..5833
note		Show value of qualifier
misc_feature	Misc. Feature	2..590
comment (0, 1)		
CDS (0, 4)		
CDS	CDS	5048..5203
CDS	CDS	3875..4999

If you input several qualifiers names (separated by comma), then the first found qualifier is taken into account and shown on the annotation.
