

Other Settings

▼ Other settings

- Remove overlapped results
- Limit results number to:
100000

The image shows a settings panel with a dropdown arrow on the left. Below the title, there are two checkboxes. The first is 'Remove overlapped results'. The second is 'Limit results number to:', followed by a text input field containing '100000' and a small spinner control to its right.

This group contains additional common settings:

Remove overlapped results — annotates only one of the overlapped results.

Limit results number to — limits number of the searched results to the specified value.
