

The "comment" Annotation

General information about a file in GenBank or Vector NTI Sequence format, stored in the COMMENT sections of the file, is shown in UGENE in a special *comment* annotation in the *Annotations Editor*.

The information, for example, may include the name of the file author, creation date and last modification date for the file, and so on:

The screenshot shows the UGENE Annotations Editor interface. On the left, a tree view displays the file structure: '2xCyPET-3xFLAG-6 features [2xCyPet-3xFLAG-...' is expanded to show 'CDS (0, 2)', 'comment (0, 1)', and 'misc_feature (0, 11)'. The 'comment (0, 1)' entry is further expanded to show a single comment with ID '01'. On the right, the details for this comment are displayed in a table-like format.

Comment	1..4340
Author name	This file is created by Vector NTI http://www.invitrogen.com/
