

Show on Translation

This option is available for nucleotide sequences only. It specifies to show the annotation on the corresponding amino sequence instead of the original nucleotide sequence in the *Sequence Detailed View*, for example:

```
.....  
  D   S   P   K   L   K  
2  I   H   Q   S   *   N  
  R   F   T   K   V   E  
AGATTACCAAAGTTGAAA  
+-----+  
3  8  10  12  14  16  18  20  22  24  
TCTAAGTGGTTTCAACTTT  
  I   *   W   L   Q   F  
  S   E   G   F   N   F
```

You can enable/disable this option by checking/unchecking the *Show on translation* checkbox.
