

# The "comment" Annotation

General information about a file in GenBank or Vector NTI Sequence format, stored in the COMMENT sections of the file, is shown in UGENE in a special *comment* annotation in the *Annotations Editor*.

The information, for example, may include the name of the file author, creation date and last modification date for the file, and so on:

The screenshot shows the UGENE Annotations Editor interface. The left pane displays a tree view of annotations for a file named "2xCyPET-3xFLAG-6 features [2xCyPet-3xFLAG-...". The tree is expanded to show a "comment (0, 1)" annotation, which is further expanded to show a "comment" entry with ID "01". The right pane displays the content of this comment, which includes the author name, creation date, last modification date, object name, and owner.

Comment	1..4340
Author name	This file is created by Vector NTI <a href="http://www.invitrogen.com/">http://www.invitrogen.com/</a>
