

Exporting 3D Structure Image

To export a 3D structure image select the *Export Image* item in the 3D Structure Viewer context menu or in the *Display* menu on the toolbar. The *Export Image* dialog will appear:

The image shows a dialog box titled "Export Image". It contains the following elements:

- A label "Export to file" above a text input field.
- A "File name" label followed by an empty text input field and a browse button (three dots).
- A "Format" label followed by a dropdown menu showing "PNG".
- A "Width" label followed by a spin box containing "3052px".
- A "Height" label followed by a spin box containing "1268px".
- Three buttons at the bottom: "Help", "Cancel", and "Export".

Here you can browse for the file name, select the width and height of the image as well as its format: svg, png, ps, jpg, jpeg, tiff, tif, pdf, bmp, or ppm. For jpg, jpeg formats the quality score parameter is available.
